

torch.mtia.get_device_capability#

[https://pytorch.org/docs/stable/generated/torch.mtia.get_device_capability.h](https://pytorch.org/docs/stable/generated/torch.mtia.get_device_capability.html)

Description:

Return capability of a given device as a tuple of (major version, minor version). device (torch.device or int, optional) – statistics for the current device, given by current_device(), if device is None (default).

Function Signature

```
torch.mtia.get_device_capability(device=None)[source]#
```

Parameters

Return type

Returns:

tuple[int, int]

Detailed Documentation

Documentation

Return capability of a given device as a tuple of (major version, minor version).

device (torch.device or int, optional) – statistics for the current device, given by `current_device()`, if device is None (default).

Return capability of a given device as a tuple of (major version, minor version).

device (torch.device or int, optional) – statistics for the current device, given by `current_device()`, if device is None (default).
