

torch.mtia.memory.memory_allocated#

https://pytorch.org/docs/stable/generated/torch.mtia.memory.memory_allocated

Description:

Return the current MTIA memory occupied by tensors in bytes for a given device. device (torch.device or int or str, optional) – selected device. Returns statistic for the current device, given by current_device(), if device is None (default).

Function Signature

```
torch.mtia.memory.memory_allocated(device=None)[source]#
```

Parameters

Return type

Returns:

int

Detailed Documentation

Documentation

Return the current MTIA memory occupied by tensors in bytes for a given device.

device (torch.device or int or str, optional) – selected device. Returns statistic for the current device, given by `current_device()`, if device is None (default).

Return the current MTIA memory occupied by tensors in bytes for a given device.

device (torch.device or int or str, optional) – selected device. Returns statistic for the current device, given by `current_device()`, if device is None (default).
