

torch.mtia.memory_stats#

https://pytorch.org/docs/stable/generated/torch.mtia.memory_stats.html

Description:

Return a dictionary of MTIA memory allocator statistics for a given device. device (torch.device, str, or int, optional) – statistics for the current device, given by current_device(), if device is None (default).

Function Signature

```
torch.mtia.memory_stats(device=None)[source]#
```

Parameters

Return type

Returns:

dict[str, Any]

Detailed Documentation

Documentation

Return a dictionary of MTIA memory allocator statistics for a given device.

device (torch.device, str, or int, optional) – statistics for the current device, given by `current_device()`, if device is None (default).

Return a dictionary of MTIA memory allocator statistics for a given device.

device (torch.device, str, or int, optional) – statistics for the current device, given by `current_device()`, if device is None (default).
