

torch.mtia.record_memory_history#

[https://pytorch.org/docs/stable/generated/torch.mtia.record_memory_history.h](https://pytorch.org/docs/stable/generated/torch.mtia.record_memory_history.html)

Description:

Enable/Disable the memory profiler on MTIA allocator enabled (all or state, optional) – statistics for the current device, given by current_device(), if device is None (default). stacks ("python" or "cpp", optional) – max_entries (int, optional) –

Function Signature

```
torch.mtia.record_memory_history(enabled='all',  
stacks='python', max_entries=0)[source]#
```

Parameters

Detailed Documentation

Documentation

Enable/Disable the memory profiler on MTIA allocator

enabled (all or state, optional) – statistics for the current device, given by current_device(), if device is None (default).

stacks ("python" or "cpp", optional) –

max_entries (int, optional) –

Enable/Disable the memory profiler on MTIA allocator

enabled (all or state, optional) – statistics for the current device, given by current_device(), if device is None (default).

enabled (all or state, optional) – statistics for the current device, given by current_device(), if device is None (default).

stacks ("python" or "cpp", optional) –

stacks ("python" or "cpp", optional) –

max_entries (int, optional) –

max_entries (int, optional) –
