

torch.permute#

<https://pytorch.org/docs/stable/generated/torch.permute.html>

Description:

Returns a view of the original tensor input with its dimensions permuted.

input (Tensor) – the input tensor. dims (tuple of int) – The desired ordering of dimensions

Function Signature

```
torch.permute(input, dims) → Tensor#
```

Parameters

Code Examples

```
>>> x = torch.randn(2, 3, 5)
>>> x.size()
torch.Size([2, 3, 5])
>>> torch.permute(x, (2, 0, 1)).size()
torch.Size([5, 2, 3])
```

Detailed Documentation

Documentation

Returns a view of the original tensor input with its dimensions permuted.

input (Tensor) – the input tensor.

dims (tuple of int) – The desired ordering of dimensions

Returns a view of the original tensor input with its dimensions permuted.

input (Tensor) – the input tensor.

input (Tensor) – the input tensor.

dims (tuple of int) – The desired ordering of dimensions

dims (tuple of int) – The desired ordering of dimensions
