

# torch.positive#

<https://pytorch.org/docs/stable/generated/torch.positive.html>

## Description:

Returns input. Throws a runtime error if input is a bool tensor. input (Tensor) – the input tensor.

## Function Signature

---

`torch.positive(input) → Tensor#`

Parameters

## Code Examples

---

```
>>> t = torch.randn(5)
>>> t
tensor([ 0.0090, -0.2262, -0.0682, -0.2866,  0.3940])
>>> torch.positive(t)
tensor([ 0.0090, -0.2262, -0.0682, -0.2866,  0.3940])
```

# Detailed Documentation

---

## Documentation

Returns input. Throws a runtime error if input is a bool tensor.

input (Tensor) – the input tensor.

Returns input. Throws a runtime error if input is a bool tensor.

input (Tensor) – the input tensor.
