

torch.ravel#

<https://pytorch.org/docs/stable/generated/torch.ravel.html>

Description:

Return a contiguous flattened tensor. A copy is made only if needed.

input (Tensor) – the input tensor.

Function Signature

`torch.ravel(input) → Tensor#`

Parameters

Code Examples

```
>>> t = torch.tensor([[[1, 2],  
...                  [3, 4]],  
...                  [[5, 6],  
...                  [7, 8]]])  
>>> torch.ravel(t)  
tensor([1, 2, 3, 4, 5, 6, 7, 8])
```
