

torch.real#

<https://pytorch.org/docs/stable/generated/torch.real.html>

Description:

Returns a new tensor containing real values of the self tensor. The returned tensor and self share the same underlying storage. input (Tensor) – the input tensor.

Function Signature

```
torch.real(input) → Tensor#
```

Parameters

Code Examples

```
>>> x=torch.randn(4, dtype=torch.cfloat)
>>> x
tensor([(0.3100+0.3553j), (-0.5445-0.7896j), (-1.6492-0.0633j),
        (-0.0638-0.8119j)])
>>> x.real
tensor([ 0.3100, -0.5445, -1.6492, -0.0638])
```

Detailed Documentation

Documentation

Returns a new tensor containing real values of the self tensor. The returned tensor and self share the same underlying storage.

input (Tensor) – the input tensor.

Returns a new tensor containing real values of the self tensor. The returned tensor and self share the same underlying storage.

input (Tensor) – the input tensor.
