

torch.rsqrt#

<https://pytorch.org/docs/stable/generated/torch.rsqrt.html>

Description:

Returns a new tensor with the reciprocal of the square-root of each of the elements of input. input (Tensor) – the input tensor. out (Tensor, optional) – the output tensor.

Function Signature

```
torch.rsqrt(input, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> a = torch.randn(4)
>>> a
tensor([-0.0370,  0.2970,  1.5420, -0.9105])
>>> torch.rsqrt(a)
tensor([      nan,  1.8351,  0.8053,      nan])
```

Detailed Documentation

Documentation

Returns a new tensor with the reciprocal of the square-root of each of the elements of input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.

Returns a new tensor with the reciprocal of the square-root of each of the elements of input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.
