

torch.set_num_threads#

https://pytorch.org/docs/stable/generated/torch.set_num_threads.html

Description:

Sets the number of threads used for intraop parallelism on CPU. To ensure that the correct number of threads is used, `set_num_threads` must be called before running eager, JIT or autograd code.

Function Signature

```
torch.set_num_threads(int)#
```

Notes & Warnings

WARNING

To ensure that the correct number of threads is used, `set_num_threads` must be called before running eager, JIT or autograd code.
