

torch.set_rng_state#

https://pytorch.org/docs/stable/generated/torch.set_rng_state.html

Description:

Sets the random number generator state. This function only works for CPU. For CUDA, please use `torch.manual_seed()`, which works for both CPU and CUDA. `new_state` (`torch.ByteTensor`) – The desired state

Function Signature

```
torch.set_rng_state(new_state)[source]#
```

Parameters

Notes & Warnings

NOTE

This function only works for CPU. For CUDA, please use `torch.manual_seed()`, which works for both CPU and CUDA.

Detailed Documentation

Documentation

Sets the random number generator state.

This function only works for CPU. For CUDA, please use `torch.manual_seed()`, which works for both CPU and CUDA.

`new_state (torch.ByteTensor)` – The desired state

Sets the random number generator state.

This function only works for CPU. For CUDA, please use `torch.manual_seed()`, which works for both CPU and CUDA.

`new_state (torch.ByteTensor)` – The desired state
