

torch.smm#

<https://pytorch.org/docs/stable/generated/torch.smm.html>

Description:

Performs a matrix multiplication of the sparse matrix input with the dense matrix mat. input (Tensor) – a sparse matrix to be matrix multiplied mat (Tensor) – a dense matrix to be matrix multiplied

Function Signature

```
torch.smm(input, mat) → Tensor#
```

Parameters

Detailed Documentation

Documentation

Performs a matrix multiplication of the sparse matrix input with the dense matrix mat.

input (Tensor) – a sparse matrix to be matrix multiplied

mat (Tensor) – a dense matrix to be matrix multiplied

Performs a matrix multiplication of the sparse matrix input with the dense matrix mat.

input (Tensor) – a sparse matrix to be matrix multiplied

input (Tensor) – a sparse matrix to be matrix multiplied

mat (Tensor) – a dense matrix to be matrix multiplied

mat (Tensor) – a dense matrix to be matrix multiplied
