

torch.sparse.as_sparse_gradcheck#

[https://pytorch.org/docs/stable/generated/torch.sparse.as_sparse_gradcheck.h](https://pytorch.org/docs/stable/generated/torch.sparse.as_sparse_gradcheck.html)

Description:

Decorate function, to extend gradcheck for sparse tensors. Decorator for torch.autograd.gradcheck or its functools.partial variants that extends the gradcheck function with support to input functions that operate on or/and return sparse tensors. The specified gradcheck function itself is guaranteed to operate on strided tensors only.

Function Signature

```
torch.sparse.as_sparse_gradcheck(gradcheck)[source]#
```

Code Examples

```
>>> gradcheck =  
torch.sparse.as_sparse_gradcheck(torch.autograd.gradcheck)  
>>> x = (  
...     torch.tensor([[0, 1], [2, 3]], dtype=torch.float64)  
...     .to_sparse_coo()  
...     .requires_grad_(True)  
... )  
>>> gradcheck(lambda x: x.to_sparse_csr(), x)  
True
```

Detailed Documentation

Documentation

Decorate function, to extend gradcheck for sparse tensors.

Decorator for `torch.autograd.gradcheck` or its `functools.partial` variants that extends the `gradcheck` function with support to input functions that operate on or/and return sparse tensors.

The specified `gradcheck` function itself is guaranteed to operate on strided tensors only.

Decorate function, to extend gradcheck for sparse tensors.

Decorator for `torch.autograd.gradcheck` or its `functools.partial` variants that extends the `gradcheck` function with support to input functions that operate on or/and return sparse tensors.

The specified `gradcheck` function itself is guaranteed to operate on strided tensors only.
