

# torch.sqrt#

<https://pytorch.org/docs/stable/generated/torch.sqrt.html>

## Description:

Returns a new tensor with the square-root of the elements of input. input (Tensor) – the input tensor. out (Tensor, optional) – the output tensor.

## Function Signature

---

```
torch.sqrt(input, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

## Parameters

---

Keyword

out (Tensor, optional) – the output tensor.

## Code Examples

---

```
>>> a = torch.randn(4)
>>> a
tensor([-2.0755,  1.0226,  0.0831,  0.4806])
>>> torch.sqrt(a)
tensor([      nan,  1.0112,  0.2883,  0.6933])
```

## Detailed Documentation

---

### Documentation

Returns a new tensor with the square-root of the elements of input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.

Returns a new tensor with the square-root of the elements of input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.
