

torch.swapaxes#

<https://pytorch.org/docs/stable/generated/torch.swapaxes.html>

Description:

Alias for `torch.transpose()`. This function is equivalent to NumPy's `swapaxes` function.

Function Signature

```
torch.swapaxes(input, axis0, axis1) → Tensor#
```

Code Examples

```
>>> x = torch.tensor([[[[0,1],[2,3]],[[4,5],[6,7]]]])
>>> x
tensor([[[[0, 1],
          [2, 3]],
        [[4, 5],
          [6, 7]]]])
>>> torch.swapaxes(x, 0, 1)
tensor([[[[0, 1],
          [4, 5]],
        [[2, 3],
          [6, 7]]]])
>>> torch.swapaxes(x, 0, 2)
tensor([[[[0, 4],
          [2, 6]],
        [[1, 5],
          [3, 7]]]])
```

Detailed Documentation

Documentation

Alias for `torch.transpose()`.

This function is equivalent to NumPy's `swapaxes` function.

Alias for `torch.transpose()`.

This function is equivalent to NumPy's `swapaxes` function.
